DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Monday, 24 June 2024 at 05:10 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: The settled, warm conditions for many southern and eastern areas are likely to lead to a gradual increase in air pollution over the next few days. Air pollution is expected to be mostly Low today, but with some Moderate pollution in southeastern parts.

Tomorrow: Increasing areas of Moderate pollution for many parts of England, perhaps just edging into parts of Wales.

Outlook: Areas of Moderate pollution for much of England and Wales. There is a risk of locally High pollution in the southeast on Wednesday. Pollution levels declining through Thursday.
